SUMMARY

Motivated and confident Computer Science student with strong communication and interpersonal skills. Interested in client-facing roles where I can interact with people, understand their needs, and provide effective solutions. Quick learner with a positive attitude, eager to build a career in sales and business development.

EXPERIENCE

AI Azure Virtual Internship

Microsoft AICTE & Edunet Foundation

- Built and deployed AI/ML models using Azure cloud platform
- Used Azure Machine Learning tools for model development and deployment
- Implemented NLP-based solutions using cloud AI services

EDUCATION

Bachelor of Technology (B.Tech)

Jaypee University of Engineering and Technology

Present

Senior Secondary (Class XII)

Modern Children Higher Secondary School

2023

- percentage: 85%

Secondary (Class X)

Modern Children Higher Secondary School

2021

- percentage: 92%

SKILLS

- Languages: C/C++, Java, Python, JavaScript
- Web & Frameworks : HTML, CSS, React.js (Basics), Flask
- Core Skills: Communication Skills, Presentation Skills, Client Interaction, Problem Solving Data Structures & Algorithms, Machine Learning, NLP, REST APIs
- Databases : MySQL, MongoDB
- Tools & Others: API Integration, Git

CERTIFICATES

- soft skills tcs

PROJECTS

Resume Screening & Job Recommendation System

- Built an AI-based resume screening system using Flask and Machine Learning models for job role prediction .
- Implemented features such as resume parsing, classification, and job recommendation
- Improved efficiency of resume filtering process through automation

Sentiment Analysis on Amazon Product

- A project aimed at analyzing customer sentiment from Amazon reviews.
- Developed a sentiment analysis model using TF-IDF and Logistic Regression achieving ~85% accuracy
- Performed data preprocessing, feature extraction, and model optimization on text data.

Lecture Notes Generator

- Developed an AI-based web application to convert lecture audio into structured study material using speech-to-text transcription.
- Implemented NLP-based text summarization and automated quiz generation from transcribed content.
- Integrated PDF export functionality for organized and downloadable notes.

KEY ACHIEVEMENTS

- Achieved ~85% accuracy in NLP-based sentiment analysis using TF-IDF and ML models
- Developed and deployed AI-based web applications using Flask with real-time interaction
- Built multiple end-to-end ML projects including resume classification and chatbot systems
