

PRIYA MEENA

Guna, India | 9644449421 | priyameena1203@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [LeetCode](#)

SUMMARY

Computer Science undergraduate (B.Tech, 2027) with hands-on experience building full-stack web applications (Flask, REST APIs, React) and applying AI/ML models on Microsoft Azure. Solved 200+ DSA problems on LeetCode with strong fundamentals in OOP, DBMS, and problem-solving. Seeking a Full Stack Developer AI role to build data- and AI-driven commerce intelligence products.

TECHNICAL SKILLS

- Languages: C/C++, Java, Python, JavaScript
- Frontend: HTML, CSS, React.js (Basics)
- Backend: Flask, RESTful APIs, .NET Framework (Learning), Object-Oriented Programming
- AI/ML & Cloud: Azure Machine Learning, NLP, Model Deployment, AI Agents (exploring)
- Database: MySQL, SQL Server (Basics), DBMS
- Core CS & Tools: Data Structures & Algorithms, Git/GitHub, API Integration, Software Development Lifecycle (SDLC), Software Testing Fundamentals

PROJECTS

Resume Screening & Job Recommendation System

GitHub ↗

Flask, Python, REST APIs

- Built a Flask-based full-stack web application to parse resumes and automatically match candidates to job roles using structured data processing
- Designed and implemented REST APIs for automated candidate classification, connecting a Python backend to a web frontend
- Engineered a rule-/data-driven recommendation logic to surface relevant job roles from parsed resume data

Sentiment Analysis on Amazon Product Reviews

GitHub ↗

Flask, Python, Machine Learning, REST APIs

- Developed a Flask web application that classifies Amazon product review sentiment in real time using an integrated ML model
- Built REST APIs to handle user input and return predictions, connecting the ML model to a usable web interface
- Deployed the trained sentiment-classification model into a live backend service for end-to-end inference

HR Analytics System for Employee Performance Tracking

Python, Power BI, Statistical Analysis

- Built a data pipeline to clean and analyze HR data, identifying key factors driving employee attrition
- Performed statistical analysis on workforce data to surface actionable trends behind employee turnover
- Designed an interactive Power BI dashboard to communicate attrition insights to non-technical stakeholders

EXPERIENCE

AI Azure Virtual Internship

Microsoft, AICTE & Edunet Foundation

- Built and deployed AI/ML models on Microsoft Azure Machine Learning, covering the model development-to-deployment lifecycle
- Implemented NLP-based solutions using Azure Cognitive/AI services for text-processing use cases
- Gained hands-on exposure to cloud-based AI workflows, from data preparation to model deployment

EDUCATION

Bachelor of Technology (B.Tech), Computer Science

Present

Jaypee University of Engineering and Technology (JUET), Guna

Senior Secondary (Class XII) — 85%

2023

Secondary (Class X) — 92%

2021

ACHIEVEMENTS & CERTIFICATIONS

- Solved 200+ Data Structures & Algorithms problems on LeetCode
- Completed AI Azure Virtual Internship — Microsoft, AICTE & Edunet Foundation
- Soft Skills Certification — TCS
