SUMMARY

Computer Science undergraduate (B.Tech 🎓, 2027) with hands-on full-stack development experience (Flask, REST APIs, React) and applied AI/ML on Microsoft Azure, aligned with enterprise digital-transformation and business-AI use cases. Solved 200+ DSA problems on LeetCode with strong fundamentals in OOP, DBMS, and SDLC. Seeking a Software Engineer role to build AI-driven, data-intensive enterprise software solutions.

EXPERIENCE

AI Azure Virtual Internship — Microsoft, AICTE & Edunet Foundation

Microsoft AICTE & Edunet Foundation

- Built and deployed AI/ML models on Microsoft Azure Machine Learning, covering the full model development-to-deployment lifecycle
- Implemented NLP-based solutions using Azure Cognitive/AI services for text-processing use cases, gaining direct exposure to enterprise AI tooling
- Gained hands-on experience with cloud-based AI workflows — data preparation, model training, deployment, and integration — relevant to enterprise digital-transformation projects

EDUCATION

Bachelor of Technology (B.Tech)

Present

Jaypee University of Engineering and Technology

Senior Secondary (Class XII)

2023

Modern Children Higher Secondary School

- percentage: 85%

Secondary (Class X)

2021

Modern Children Higher Secondary School

- percentage: 92%

SKILLS

- Languages: C/C++, Java, Python, JavaScript
- Web & Frameworks : HTML, CSS, React.js (Basics), Flask, REST APIs
- AI/ML & Cloud: Azure Machine Learning, NLP, Model Deployment, API Integration, AI Agents (Exploring)
- Database: MySQL, SQL Server (Basics)
- Core CS & Tools: Data Structures & Algorithms, Git/GitHub, SDLC, Software Testing Fundamentals.

PROJECTS

Resume Screening & Job Recommendation System

Flask, Python, REST APIs, Rule-Based Recommendation Logic

- Built a full-stack Flask web application that parses resumes and automatically matches candidates to job roles using structured data processing, reducing manual screening effort
- Designed and implemented RESTful APIs for automated candidate classification, integrating a Python backend with a web frontend
- Engineered data-driven recommendation logic to surface relevant job roles from parsed resume data, demonstrating applied problem-solving in an AI-adjacent, enterprise-style workflow

Sentiment Analysis on Amazon Product Reviews

Flask, Python, Machine Learning, REST APIs, NLP

- Developed a Flask web application that classifies Amazon product review sentiment in real time using an integrated ML/NLP model
- Built REST APIs to handle user input and return predictions, connecting the ML model to a usable web interface end-to-end
- Deployed the trained sentiment-classification model into a live backend service, delivering a working AI-powered product feature

HR Analytics System for Employee Performance Tracking

Python, Power BI, Statistical Analysis

- Built a data pipeline to clean and analyze HR data, identifying key factors driving employee attrition for business decision-making
- Performed statistical analysis on workforce data and designed an interactive Power BI dashboard to communicate insights to non-technical stakeholders

ACHIEVEMENTS & CERTIFICATIONS

- Solved 200+ Data Structures & Algorithms problems on LeetCode
- Completed AI Azure Virtual Internship — Microsoft, AICTE & Edunet Foundation
- Soft Skills Certification — TCS
