Career Objective

Computer Science Engineering student with a strong foundation in **backend development, SQL databases, REST APIs, data structures and algorithms, and software development fundamentals**. Hands-on experience with **Python, Flask, REST API development, SQL, Git/GitHub, and API integration** through academic and personal projects. Strong problem-solving, troubleshooting, analytical thinking, and attention to detail, with a keen interest in building scalable and maintainable backend applications.

Education

B.Tech – Computer Science Engineering

Jaypee University of Engineering and Technology, Guna | Expected 2027

Senior Secondary (Class XII) — 78%, Modern Children Higher Secondary School

Secondary (Class X) — 62%, Modern Children Higher Secondary School

Technical Skills

Sql Databases

MySQL, SQL Queries, SELECT, WHERE, JOIN, GROUP BY, ORDER BY, Aggregate Functions, Subqueries

Git & GitHub

Git, GitHub, Version Control, Repository Management

Generative AI

Prompt Engineering, LLM

Data Structures & Algorithms

Arrays, Strings, Linked List, Stack, Queue, Searching, Sorting, Recursion

Web Development

HTML5, CSS3, Flask, REST API

Software Development

Debugging, Troubleshooting, Problem Solving, Software Design Fundamentals

Certifications & Achievements

Internship [🔗](#)

Remote

Projects

AI Chatbot | Python, Gemini API, Generative AI

- Developed an AI chatbot using **Python, Flask, and Gemini API**.
- Integrated APIs to process user queries and generate conversational responses.
- Implemented backend request handling, prompt engineering, and testing.
- Debugged API functionality to improve application reliability.

Book Recommendation System

- Developed a book recommendation system using Python to provide relevant book suggestions based on user preferences.
- Implemented recommendation logic and backend functionality using Flask.
- Used SQL for storing and retrieving book-related data.
- Built a simple web interface using HTML and CSS

Key Achievements

Completed a Technical Internship gaining practical software development experience. Built projects involving AI, REST APIs, Flask, Python, and SQL. Strengthened problem-solving skills through Data Structures & Algorithms
